

DOI Work Activity L9: Assess Non-Invasive Species

Program Area:	Knowledge Advancement
End Outcome Goal:	PEO 2 – Sustain Biological Communities on DOI Managed and Influenced Lands and Waters in a Manner Consistent with Obligations Regarding the Allocation and Use of Water
Intermediate Outcome:	This activity does not align to an intermediate outcome
DOI Sub process:	1b - Create information from data (perform analysis)

Examples/Notes

Work Activity Description: Investigations that evaluate the status, condition, or other relevant aspects of non-threatened/endangered indigenous species, both resident and non-resident on DOI lands; may be conducted on a geographic basis. Activities may include collection, analysis, management, interpretation, and synthesis of data, and reporting and publishing of data to produce an assessment. Other tasks may include:

- Working with states, tribes and other partners to develop, coordinate, monitor and conduct wildlife and plant studies;
- Develop technical and scientific publications and complete peer reviews;
- Develop proposals and collaborative study plans;
- Secure partners, funding, and permits;
- Conduct field work and analysis;
- Conduct regional research coordination;
- Compile wildlife and plant species lists and databases;
- Conduct wildlife mark/recapture studies;
- Analyze population viability;
- Assess species;
- Conduct periodic biological reviews;
- Design, collect, analyze, and disseminate digital spatial data.

Excludes environmental consultations or regulatory compliance work. Excludes non-indigenous species, candidate species, and threatened and endangered species.

Output: Assessments completed (e.g. Status & Trends, etc.)	Unit of Measure: Number of assessments completed
